Drawings

The informal drawings are acceptable for examination purposes only. The formal drawings are now required.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Att. Klos on September 21, 2005.

The application has been amended as follows:

In the specification

Page 3, under "Brief description of the drawings" section, last line, replace "Fig. 8 is" with – Figs. 8a-8b are –.

In the claims

In claim 11, line 1, replace "2" with – 3 --.

Reasons for allowance

The following is an examiner's statement of reasons for allowance:

The present invention is drawn to a phase multiplier circuit utilizing a plurality of phase multiplier subcircuits, where in the plurality of phase multiplier subcircuits comprising first – sixth dual gate transistors, first – eleventh transistors, first – second inverters recited in claims 1-11; or means for generating substantially equal bias

currents, means for generating a phase current, means for generating a voltage and means for controlling the phases recited in claim 12; or a bias current generator, a phase current generator, a voltage generator, and a phase controller recited in claim 14. None of the prior art disclosed or suggested to show the particular structure and/or the particular operation recited in these claims namely: **"the first –fifth dual gate transistors"** in combination with **"the first –fifth transistors"** and **"the first – second inverters"** as recited in claim 1; **"the first – sixth dual-gate transistors"** in combination with **"the first – eighth transistors"** and **"the first – second inverters"** as recited in claim 3; the **"means for generating substantially equal bias currents... an the output signal with the largest phase"** and **"for each output signal ... means for generating a phase current ... and of a polarity opposite that of the bias currents"** in combination with **"for each output signal, means for generating a voltage .. onto a loop filter capacitance"** and **"means for controlling the phases which includes voltage-controlled delay elements..."** as recited in claim 12; **"the bias current generator"** and **"the phase current generator"** in combination with **"the voltage generator ... a loop filter capacitance"** and **"the phase controller"** as recited in claim 14.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
